ABOUT

Informatics student at Gunadarma University with a genuine passion for UI/UX Design, Fullstack Development, and QA Engineer. I love turning ideas into real products — designing user-centered interfaces and building them into functional, scalable applications — and I'm always eager to dive deeper into IT, sharpen my engineering skills, and grow as a well-rounded software engineer.

EDUCATION

Bachelor of Informatics · Gunadarma University 2023 – Present

GPA: 3.67 / 4.00 (6th Semester) · Relevant courses: Fullstack Developer, Data Structures, Databases, AI, UI/UX Design, Machine Learning

Coding Camp Full-Stack Developer · DBS Foundation x Dicoding 2025 – 2026

Scholarship-based intensive program focused on modern full-stack web development, covering JavaScript, React.js, Node.js, Express.js, REST APIs, databases, deployment, and collaborative software development.

WORK EXPERIENCE

UI Designer — Career Apprentice · Harisenin.co Sep 2025 – Des 2025

- Designed multiple UI screens and reusable components from brief to final handoff.
- Collaborated with senior designers in critique sessions to refine usability and design consistency.

Full-Stack Web Developer & UI/UX Engineer (Freelance) · Project-Based Jan 2022 – Present

- Developed and shipped responsive web apps using React.js, Next.js, and REST APIs.
- Owned the pipeline end-to-end — from Figma UI/UX design to production front-end code.

Computer Lab Assistant · VM Lepkom Gunadarma Sep 2024 – Present

- Tutored 30+ students per semester in full-stack web development and IT support.
- Contributed to internal web projects — REST API design, database management, and front-end.

Web Developer & Creative Designer · OpenSea Company Jan 2020 – Apr 2021

- Developed front-end components for NFT project pages to support marketplace launches.
- Built responsive landing pages in HTML, CSS, and JS with a focus on performance and cross-browser support.

PROJECTS

SiaGas — PKM-KC — IoT & AI Gas Leak Detection System · PIMNAS 2025 Finalist

- Designed the UI/UX and built the web dashboard in React.js/Next.js.
- Learned IoT hardware (Arduino/ESP32, gas sensors) and produced pitch assets for the PIMNAS 2025 final.

Game Development Project — 3D Game · Unity, Blender & C++ Campus Projects

- Built a 3D game in Unity, modeled and textured assets in Blender, and programmed core gameplay logic in C++.

Nutrify Web — Food Intelligence Web App · Scholarship Coding Camp DBS Foundation x Dicoding 2026

- Built a fullstack AI web app (React.js, Express.js) that classifies food images and delivers nutrition recommendations.
- Integrated REST APIs across frontend, backend, ML model, and Gemini AI for a tracking dashboard.

AI Business App for UMKM — International Business Plan Pitch · Top 3 & Best Presentation

- Led product design for an AI-powered business app — UX research, personas, and prototypes.

- Earned Top 3 and Best Presentation internationally.

SentiWeb — *Web-Based Product Review Sentiment Classification System*

- Built a sentiment analysis app (React.js, Flask) classifying reviews with Naive Bayes and SVM.
- Applied TF-IDF, Word2Vec, and SMOTE, with visualizations for model evaluation.

Web Projects Applications — *Personal Projects · HTML/CSS/JS & React.js, Express.js, PHP, MySQL*

- Built several CRUD web apps — inventory, task tracking, and data management — using JS and PHP.
- Designed with responsive UI and clean, reusable components.

UI/UX Projects — *National & Regional Design Competitions*

- Designed 10+ mobile app products end-to-end in Figma — research to hi-fi prototypes dan ux research.
