ABOUT

Informatics student at Gunadarma University with a strong interest in UI/UX Design, Fullstack Web Development, and IT. I enjoy solving problems through design and technology — whether crafting user-centered interfaces or building functional web applications — and I'm always eager to learn and grow in a professional environment.

EDUCATION

Bachelor of Informatics · Gunadarma University 2023 – Present

GPA: 3.67 / 4.00 (6th Semester) · Relevant courses: Fullstack Developer, Data Structures, Databases, AI, UI/UX Design, Machine Learning

Coding Camp Full-Stack Developer · DBS Foundation x Dicoding 2025 – 2026

Scholarship-based intensive program focused on modern full-stack web development, covering JavaScript, React.js, Node.js, Express.js, REST APIs, databases, deployment, and collaborative software development.

WORK EXPERIENCE

UI Designer — Career Apprentice · Harisenin.com 2025 · 3 months

- Designed and structured multiple UI screens and reusable components, following a development-ready design process from brief to final handoff.
- Collaborated with senior designers and mentors in structured critique sessions, iterating on UI designs to improve usability, visual hierarchy, and design system consistency.

Full-Stack Web Developer & UI/UX Engineer (Freelance) · Project-Based 2022 – Present

- Developed and shipped 10+ responsive web applications using React.js, Next.js, and REST API integration for global clients via Fiverr and Sribulancer.
- Owned the product pipeline end-to-end — designing UI/UX in Figma (wireframes, prototypes, design systems) and engineering it directly into production front-end code.

Computer Lab Assistant · VM Lepkom Gunadarma 2024 – Present

- Tutored 30+ students per semester in full-stack web development (HTML, CSS, JavaScript, MySQL, Golang) and provided IT support during lab sessions.
- Contributed to 3+ internal web projects using fullstack development — REST API design, database management, and responsive front-end.

Web Developer & Creative Designer · OpenSea Company 2020 – Apr 2021

- Developed front-end components and interactive elements for NFT project pages, supporting marketplace promotion and launch.
- Built and optimized responsive landing pages in HTML, CSS, and JavaScript to support NFT collection launches, focusing on performance and cross-browser compatibility.

PROJECTS

SiaGas — PKM-KC — IoT & AI Gas Leak Detection System · PIMNAS 2025 Finalist

- Designed end-to-end UI/UX (flows, wireframes, hi-fi prototypes) for IoT gas monitoring app and web dashboard in Figma; produced branding and pitch assets for the PIMNAS 2025 national final.

Nutlify Web — Food Intelligence Web App · Scholarship Coding Camp DBS Foundation x Dicoding 2026

- Developed a fullstack AI-powered web application using React.js and Express.js that classifies food images via CNN model, delivering real-time nutritional analysis and personalized health recommendations for 5+ chronic conditions.
- Integrated REST APIs across React.js frontend, Express.js backend, ML model, and Gemini AI Consultant, delivering a nutrition tracking dashboard with progress history.

AI Business App for UMKM — International Business Plan Pitch · Top 3 & Best Presentation

- Led end-to-end product design for an AI-powered business app — UX research, personas, and Figma prototypes — earning Top 3 and Best Presentation internationally.

Web Projects Applications — *Personal Projects · HTML/CSS/JS & React.js, Express.js, PHP, MySQL*

- Developed 5+ CRUD-based web applications (inventory management, task tracking, data management) using JavaScript and PHP, with fully responsive UI and clean component architecture.

Competition UI/UX Projects — *National & Regional Design Competitions*

- Designed 5+ mobile app products end-to-end in Figma (UX research, wireframes, hi-fi prototypes); won 1st Place Technofair 12.0 (2025), 3rd Place Find IT UGM (2026), Top 10 INFEST & IDENTITAS (2024).
